The exchange program has left us with new and loving friends all over the world. Haley Bruder the eldest daughter had the chance to go an exchange in return for us housing Javiera. Haley began her journey by leaving Canada in late august heading to Columbia to visit Maria and Sophia, then jumping from Columbia to Chile. Where she began her exchange for a two months.

Over the course of the years we have developed an understanding and appreciation of different cultures and their ways of life. The exchange program doesn't just allow for students to come here and learn english, it also allows for the host family's to learn their language as well.

Students from other countries also allows for some new experiences in food preparation and flavours. Jana out German exchange student was vegetarian, which allowed us to try tofu and many other vegan meals.

This program has changed the lives of many and made memories we will never forget.
